

Annual Appraisal Overview for Rating Official

The supervisor will evaluate employee performance by assessing performance against the elements and standards in the employee's approved performance plan and assigning a rating of record based on work performed during the appraisal cycle. A written rating of record must be provided at the end of the appraisal cycle for each employee who has been under an approved performance plan for 90 calendar days during the cycle.

Employee input, while not mandatory, is highly encouraged. When provided, employee input becomes a part of the employee performance file. The absence of employee input does not relieve the supervisor of the responsibility for writing a narrative statement that succinctly addresses the employee's performance measured against the performance standards for the appraisal cycle.

The performance narrative justifies how an employee's ratings are determined and provides support for recognition and rewards (or any administrative or adverse action, if necessary).

The supervisor will assign an individual performance element rating of 5, 3, or 1 to each critical element. All performance element ratings are averaged to calculate the rating of record, which reflects the employee's overall performance during the appraisal cycle based on the rating criteria outlined in Table 1.

Performance narratives are required for each element rated '5' Outstanding and '1' Unacceptable.

Table 1 – Rating Level and Criteria

Rating Level	Rating Criteria
Level 5 – Outstanding	The summary rating of all performance element ratings is 4.3 or greater, with no element being rated a '1' (Unacceptable), resulting in a rating of record that is a '5'
Level 3 – Fully Successful	The summary rating of all performance element ratings is less than 4.3, with no element being rated a '1' (Unacceptable), resulting in a rating of record that is a '3'
Level 1 – Unacceptable	Any performance element rated as '1'
