

AMEDD Civilian Corps Chief Msg # 69--Federal Employee Viewpoint Survey (FEVS)

16 May 2016

Calling all AMEDD Civilian Corps Members!

Please take a moment and think back/look back thru your emails to see if you received a message asking you to complete the FEVS survey this year. It was sent to a random group of individuals across the Army, including Army Medicine, equaling approximately 20% of the force. I got it and have completed it.

This is an opportunity for us to make input on how we see/feel about/perceive our mission, organizations, and workplaces. Army is very seriously looking at what strengths and weaknesses come out of the survey in order to build a way ahead for our Army Civilian Corps. This is your chance to contribute and make an impact.

A couple of quick points:

--Your link is specific to you so others won't be able to use it --The original message went out with an invalid email certificate--red line across the top (including the one I received). We've checked it out and it is from a trusted site so don't worry about it; go ahead and use the information to access the survey.

Please take the time to make your input and make an impact on the Army way ahead for civilians; it only takes about 12 minutes!! Thanx in advance for your support!!!

Until next time,

gregg
